RULES SHEET

DIFFICULT TOPICS

COMMON QUESTIONS

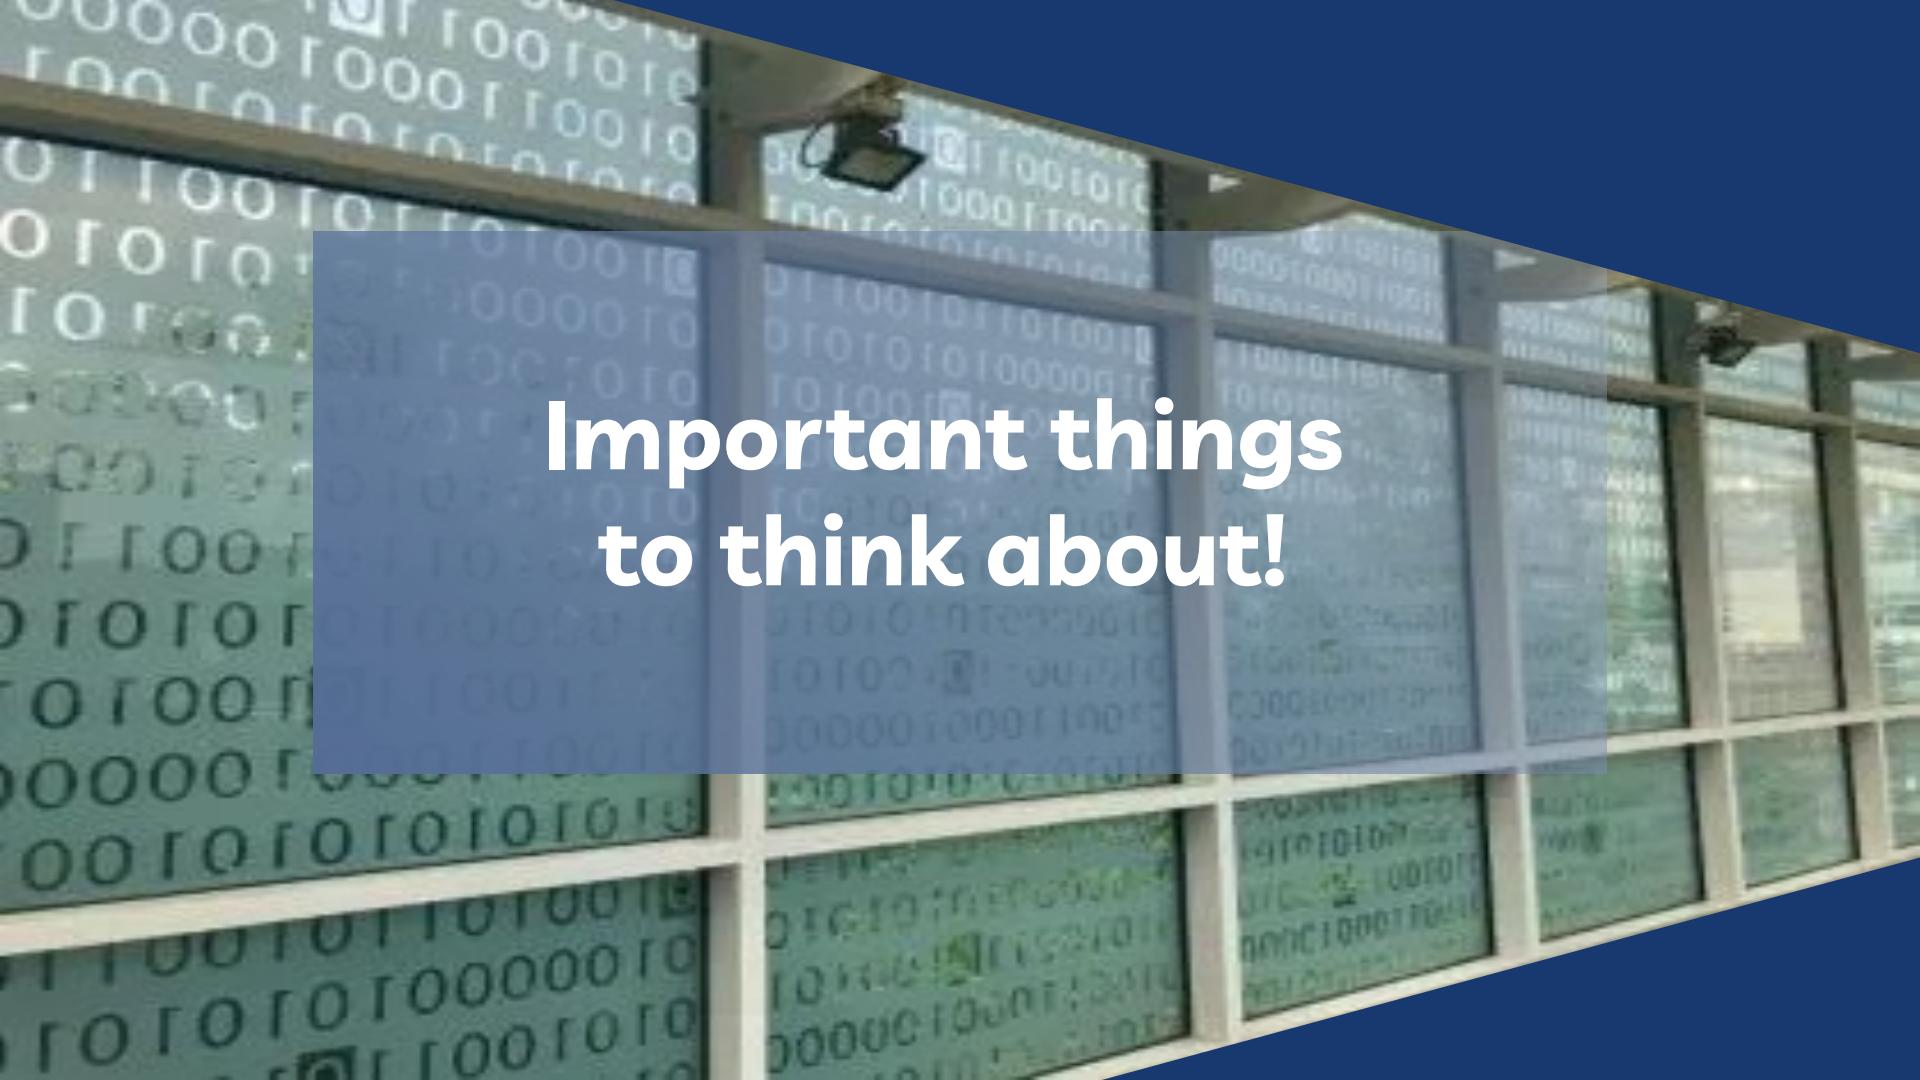

TIPS FROM A VETERAN

OTHER FREE RESOURCES

The Rules Sheet

- 2" 3-ring binder, Field Guide, magnifying glass
- Memorize appearances, key features, Class, Order, Family, Common Name
- Very knowledge/rote memorization based!

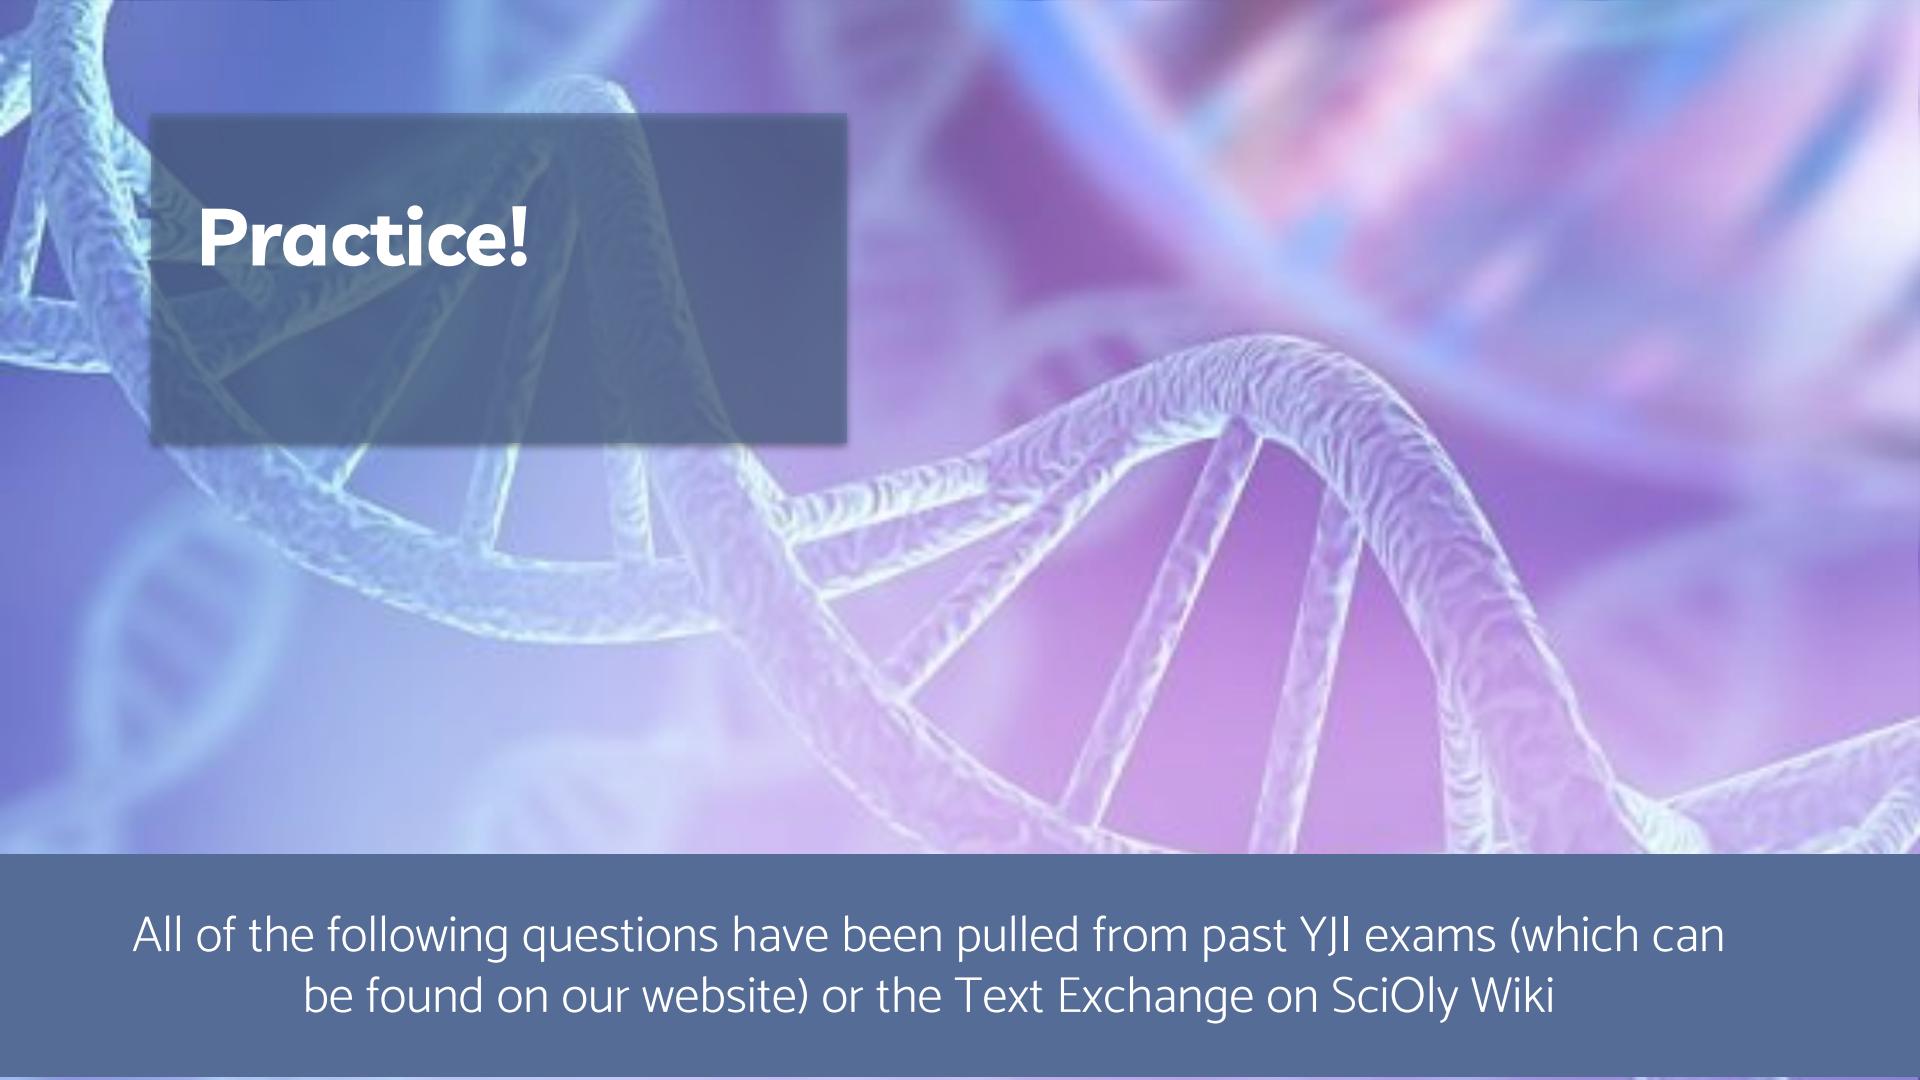

**Important things
to think about!**

Topic 1: Organizing a Binder!

- Figuring out what kind of format works for you!
 - Images + Info
 - Just Images
 - Just Info
- Charts are your best friend
 - Anatomy diagrams
 - Body part adaptations
 - Morphogenesis

Topic 2: Human Impact

- Important to build intuition for how insects relate to human life
- Positive: food, pollination, control populations of harmful insects
- Negative: vectors for disease, damage crops and buildings

Practice!

All of the following questions have been pulled from past YJI exams (which can be found on our website) or the Text Exchange on SciOly Wiki

Question 1: ID

1. Identify the order, family, and common name of the specimen.
2. In what kind of environment is this family of insect usually found?

Question 1: ID

1. Order Orthoptera,
Family Tetrigidae, Pygmy
Grasshopper
(awl-shaped pygmy
grasshopper)
2. Most reside in
rainforests! But this
particular species is
found in moist
grasslands near streams,
riverbanks and mudflats.

Question 2: Dichotomous Key

Make a Dichotomous Key for these 5 Insects:

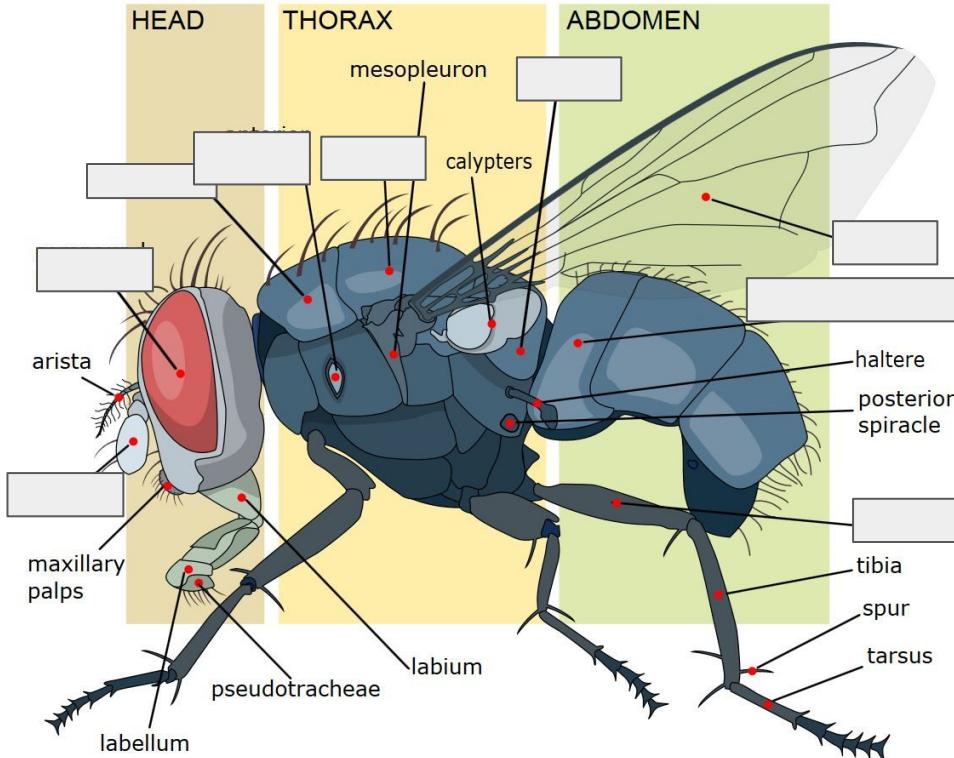

Question 2: Dichotomous Key

- Make a Dichotomous Key for These 5 Insects (always one step less than # of specimens)!
 - a. Concealed mouthparts → 2
 - b. Exposed mouthparts → 3
- 2.
 - a. Have multi-segmented antennae → Diplurans
 - b. No antennae → Proturans
- 3.
 - a. Large, well developed back legs → 4
 - b. Smaller back legs → Blattodea (cockroach)
- 4.
 - a. Long antennae → Tettigoniidae (katydids)
 - b. Short antennae → Acrididae (short-horned)

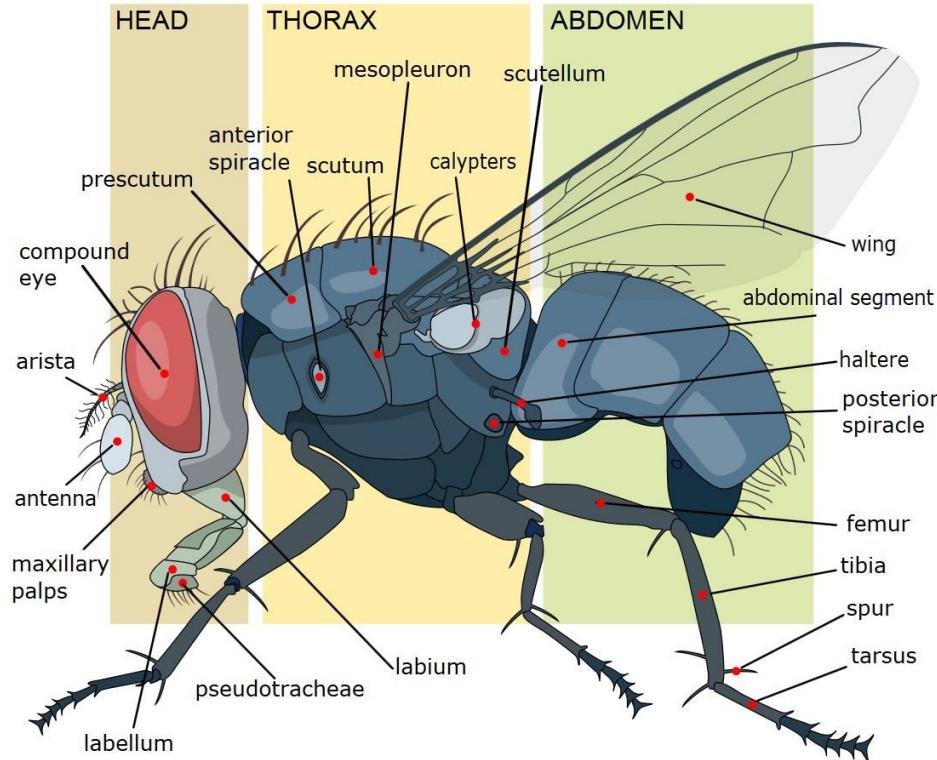

Question 3: Label!

Word Bank:

- Compound Eye
- Antenna
- Prescutum
- Scutum
- Scutellum
- Wing
- Abdominal Segment
- Femur

Question 3: Label!

Tips from a Veteran

- Assemble a rudimentary binder ASAP so that you can spend the rest of the year adding to it and memorizing key information!
- Make a Quizlet multiple images of each specimen so you can get used to looking at different angles for different things.
- Practice tests! You unfortunately don't have many of these, so I would use other people's Quizlets or test each other with the field guide.
 - Speed IDing is key!
